

I am a highly **skilled Java Developer** with over **5+ years of hands-on experience** in designing, developing, and maintaining high-performance, scalable, and secure applications. Proficient in **Java, Spring Boot, Spring Cloud, and Hibernate**, with expertise in building **RESTful APIs** and implementing **microservices architectures** to create robust enterprise-level solutions. Well-versed in **database management** and optimization, with a deep understanding of **SQL** databases such as **MySQL** and **PostgreSQL**. Experienced in leveraging **AWS cloud services** (EC2, S3, RDS) and **containerization technologies** like **Docker** and **Kubernetes** to streamline application deployment and enhance scalability. Adept at implementing **CI/CD pipelines** using tools like **Jenkins, GitLab CI**, and **Maven** to ensure efficient, automated software delivery and deployments. In-depth experience in **unit testing** with frameworks like **JUnit, Mockito, and TestNG** to ensure comprehensive code coverage and high-quality software. A strong advocate for **Agile methodologies**, working seamlessly in **cross-functional teams** and contributing to all stages of the software development lifecycle (SDLC). Possesses excellent problem-solving skills, attention to detail, and the ability to meet deadlines while working on complex projects. Passionate about continuous learning and adopting the latest development practices and tools to ensure optimal performance and future-proof solutions

EDUCATION

Southern Arkansas University, Arkansas, US (GPA: 3.7/4.0)	Aug 2023
Master of Engineering in Computer and Information Science	
Coursework: Data & Visualization, Big Data, Fundamentals of Database, Data Structures and Algorithms, Software Engineering	
Jawaharlal Nehru Technological University, Hyderabad, India	May 2019
Bachelor of Engineering in Computer Science	

SKILLS

Programming Languages	Python, SQL, C, C++, JavaScript, Java, R-Programming
Frameworks & Libraries	Spring Boot, Spring MVC, Spring Cloud, Hibernate, JPA
Technical Tools	Tableau, Power BI, Spark, PySpark, Jenkins, Git, JIRA
Cloud Technologies	AWS (EMR, EC2, Lambda, S3, Athena, Glue), GCP, Microsoft Azure
Web-Applications	HTML, CSS, JavaScript, Reactjs, UI/UX
Testing & Debugging	Junit, Mockito, Cucumber (BDD), Selenium, PostUI, PostMan
Databases	MongoDB, MySQL, PostgreSQL, SQLite
Microservices & API	JAX-RS, JAX-WS, SOAP, GraphQL
OS	Android, Linux, macOS, Windows
Business Rules engine	Corticon & Drools
IDE	Eclipse, Visual Studio, IntelliJ idea, Net Beans

WORK EXPERIENCE

7-Eleven	Oct 2025 — Present
Software Developer	Texas, USA
- Developed and maintained tax-calculation logic to determine when individual U.S. states crossed the \$100K economic-nexus threshold, triggering automated tax collection for retail transactions. - Built and optimized RESTful APIs using Java, Spring Boot, and Spring Cloud, improving system reliability and reducing response times across high-traffic services. - Modernized legacy store-management modules by migrating them to AWS (EC2, S3, Lambda, RDS), improving scalability and reducing operational costs.	

- Designed and executed scenario-based testing using **Postman** to validate multi-state tax-collection accuracy and ensure compliance with state-specific regulations.
- Utilized **MongoDB** to store, query, and analyze tax-related datasets, improving validation speed and reporting accuracy.
- Integrated **MFT Tax** and **OneSource** platforms to automate multi-state tax-compliance workflows, ensuring accurate and timely tax reporting.
- Designed and optimized **REST APIs** for tax-nexus validation, transaction processing, and internal system integrations.
- Monitored application performance and production health using **New Relic**, identifying bottlenecks and improving system reliability.
- Worked with **AWS services** to deploy, scale, and monitor tax-calculation modules in production retail environments.
- Implemented monitoring and logging using **ELK Stack** and **Splunk**, improving incident response and reducing production downtime.
- Followed Agile methodologies, participating in sprint planning, code reviews, and daily stand-ups to ensure timely delivery of high-impact features.

Deloitte

Apr 2024 — Oct 2025

Java Developer

Texas, USA

- **Developed and maintained** secure, scalable **Java applications** for the **State of New Mexico's benefits distribution program**, ensuring compliance with government regulations and secure data processing.
- Designed, developed, and maintained **Java-based applications** supporting SNAP, Medicaid, and Medicare eligibility and benefits processing.
- Implemented **AWS services (EC2, S3, RDS, Lambda)** to modernize and scale legacy benefits applications, improving system reliability and cost-efficiency.
- Developed and integrated **RESTful APIs** to enable secure data exchange between state agencies and federal healthcare systems.
- Enhanced application performance by optimizing **SQL queries in RDS** and leveraging **AWS caching solutions**.
- Collaborated with cross-functional teams, including policy analysts and healthcare specialists, to translate program requirements into technical solutions.
- Built **CI/CD pipelines** with Git, Jenkins, and AWS CodePipeline to streamline deployments and reduce release cycles.
- Troubleshooted and resolved **production issues in Medicaid/SNAP benefit systems**, ensuring uninterrupted service delivery to citizens.
- Implemented **data security and compliance measures** in line with HIPAA and state government standards.
- Assisted in **data migration** from legacy systems to modern **Java-based services**, ensuring a seamless transition and minimal disruption to ongoing benefits services.
- Implemented **Agile methodologies**, participating in **scrum sprints** to rapidly develop, test, and deploy new features and updates for the benefits program.

PWC

September 2023 — Apr 2024

Java Developer

California, USA

- **Developed and maintained** scalable, high-performance **Java applications** for critical business functions at Frugal, supporting large-scale telecommunication services and customer-facing platforms.
- Expertise in **Java, Spring Boot, and Spring Cloud** for designing and building **microservices** architectures, optimizing communication between systems and enhancing application performance.
- **Optimized database queries** and integrated **Hibernate** for improved data processing and enhanced user experience.
- Managed **CI/CD pipelines** using **Jenkins** and **Git**, streamlining the integration and deployment process, ensuring faster releases and updates.
- Conducted **code reviews** using **SonarQube**, ensuring consistent code quality, identifying vulnerabilities, and maintaining compliance with industry standards.
- Developed **Python scripts** for **data extraction, transformation, and loading (ETL)**.

Southern Arkansas University

Aug 2022 — Jul 2023

Graduate Assistant

Arkansas, USA

- Assisted in **designing and developing Java-based applications**, focusing on **object-oriented programming (OOP) principles** and best coding practices.
- Developed and maintained **RESTful APIs** using **Spring Boot** and **Hibernate**, improving data retrieval efficiency.
- Worked on **database design and optimization**, writing complex SQL queries and stored procedures in **MySQL/PostgreSQL**.
- Assisted in **debugging, testing, and code optimization**, ensuring **better performance and maintainability** of Java applications.
- Developed small-scale **microservices** and worked with **Spring Cloud** for better service management and scalability.
- Gained hands-on experience in **version control systems** like **Git/GitHub**, collaborating with teams on code reviews and feature enhancements.

- Assisted in setting up **CI/CD pipelines using Jenkins**, automating the build and deployment process.
- Implemented **unit testing using JUnit and Mockito**, improving test coverage and reducing production bugs.
- Gained exposure to **cloud platforms** like **AWS (EC2, S3, RDS)** for deploying and managing Java applications.
- Provided **technical documentation and research support**, helping students and faculty with programming tasks and debugging issues.

Tech Mahindra

Jul 2019 — Nov 2021

Java Developer

Hyderabad, India

- Integrated structured data from Sales (SQL), CRM (API), and Inventory (CSV) systems using ETL techniques.
- Developed and maintained **Java applications** for state government benefit systems, ensuring seamless processing of SNAP, Medicaid, and Medicare cases.
- Migrated legacy modules to the **AWS cloud (EC2, S3, RDS, Lambda)**, improving scalability and reducing infrastructure costs.
- Designed and implemented **RESTful web services** to enable integration with external healthcare and benefits platforms.
- Automated deployments using **CI/CD pipelines** (Git, Jenkins, AWS CodePipeline), reducing release time and minimizing manual errors.
- Optimized **AWS infrastructure usage** for performance and cost efficiency by implementing right-sizing strategies and storage lifecycle policies.
- Collaborated with onshore and offshore teams to deliver enhancements on schedule while ensuring compliance with HIPAA and state security standards.
- Monitored and troubleshooted **production issues** in cloud-hosted applications, ensuring high availability and minimal downtime.
- Contributed to **Agile ceremonies** (sprint planning, retrospectives) and delivered user stories aligned with program goals and state requirements.
- Implemented **CI/CD pipelines** using **Jenkins, Docker, and Kubernetes**, streamlining automated builds and deployments.
- Used **SonarQube** for static code analysis, identifying vulnerabilities, enforcing clean code principles, and improving security compliance.

Skills Gap Analysis:

PROJECTS

- Developed a **full-stack Employee Management System** using **Java, Spring Boot, Hibernate, and MySQL**, implementing **CRUD functionalities** and **role-based authentication** with **Spring Security**.
- Designed and deployed a **microservices-based E-Commerce Platform** using **Spring Cloud, Netflix Eureka, RabbitMQ, Kubernetes, and Docker**, ensuring **high availability and auto-scaling**.
- Implemented **Spring Cloud Gateway** for **API management** and **RabbitMQ** for **asynchronous communication**, improving system performance and reducing latency.
- Built a **real-time Stock Market Dashboard** with **WebSockets, Kafka, MongoDB, and Angular**, fetching live stock prices from external APIs and displaying data interactively.
- Developed an **automated CI/CD pipeline** integrating **SonarQube, Jenkins, GitHub Actions, and Docker**, improving **code quality and security analysis** before deployment.
- Configured **JWT-based authentication** for secure API access and optimized database interactions using **Spring Data JPA**, reducing query execution time by 30%.
- Utilized **Kubernetes for container orchestration**, ensuring **scalability and fault tolerance** of deployed microservices.
- Integrated **multi-threading and event-driven architecture** in stock tracking applications, reducing data update latency by 40%.
- Used **Log4j, ELK Stack (Elasticsearch, Logstash, Kibana), and Splunk** for logging, monitoring, and debugging application issues.
- Enhanced **DevOps automation** with **Jenkins, GOCD, Concourse**, and managed **version control using Git and GitHub**.

CERTIFICATIONS

- Basics of Artificial Neural Networks.
- IBM: Data Science and Machine Learning Practitioner
